Discussion

# Context I

The aim is to explore a possible model of care in which **DHTs** and **DTx** *complement and support* education, prevention, and care of the **Italian NHS**.

Workforce shortages  
Ageing population  
Lifestyles  
Chronicity

Barriers to innovation

# Context II: Definitions & Examples

## Electronic Health Record (EHR)

Televisits, telemonitoring

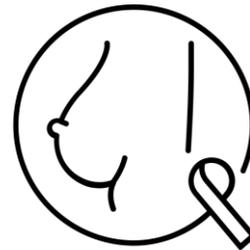

Created by Bold Yellow from Noun Project

Created by Bold Yellow from Noun Project

- In Italy: regional EHR

## Clinical decision support

Created by N.Style from Noun Project

- ProFoundAi (breast cancer recognition)

## Digital Therapeutics (DTx)

Created by Puspito from Noun Project

Created by Kholifah from Noun Project

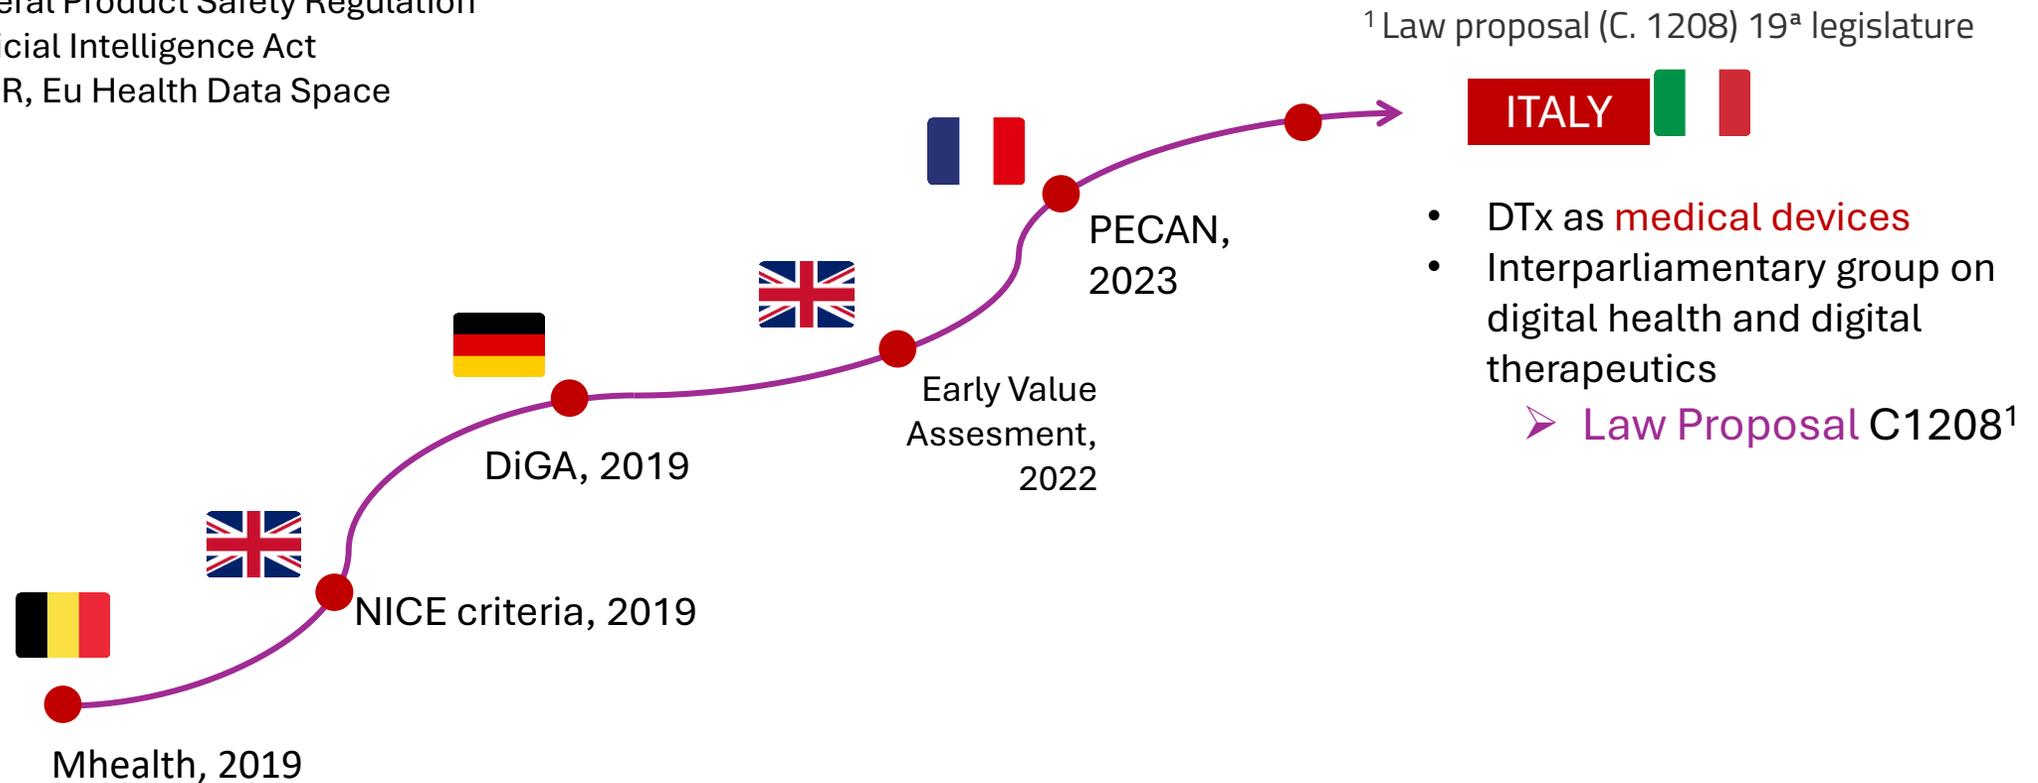

Created by Puspito from Noun Project

- Deprexis (mental health)
  - Kaia (back pain)
  - Meeva (autism)

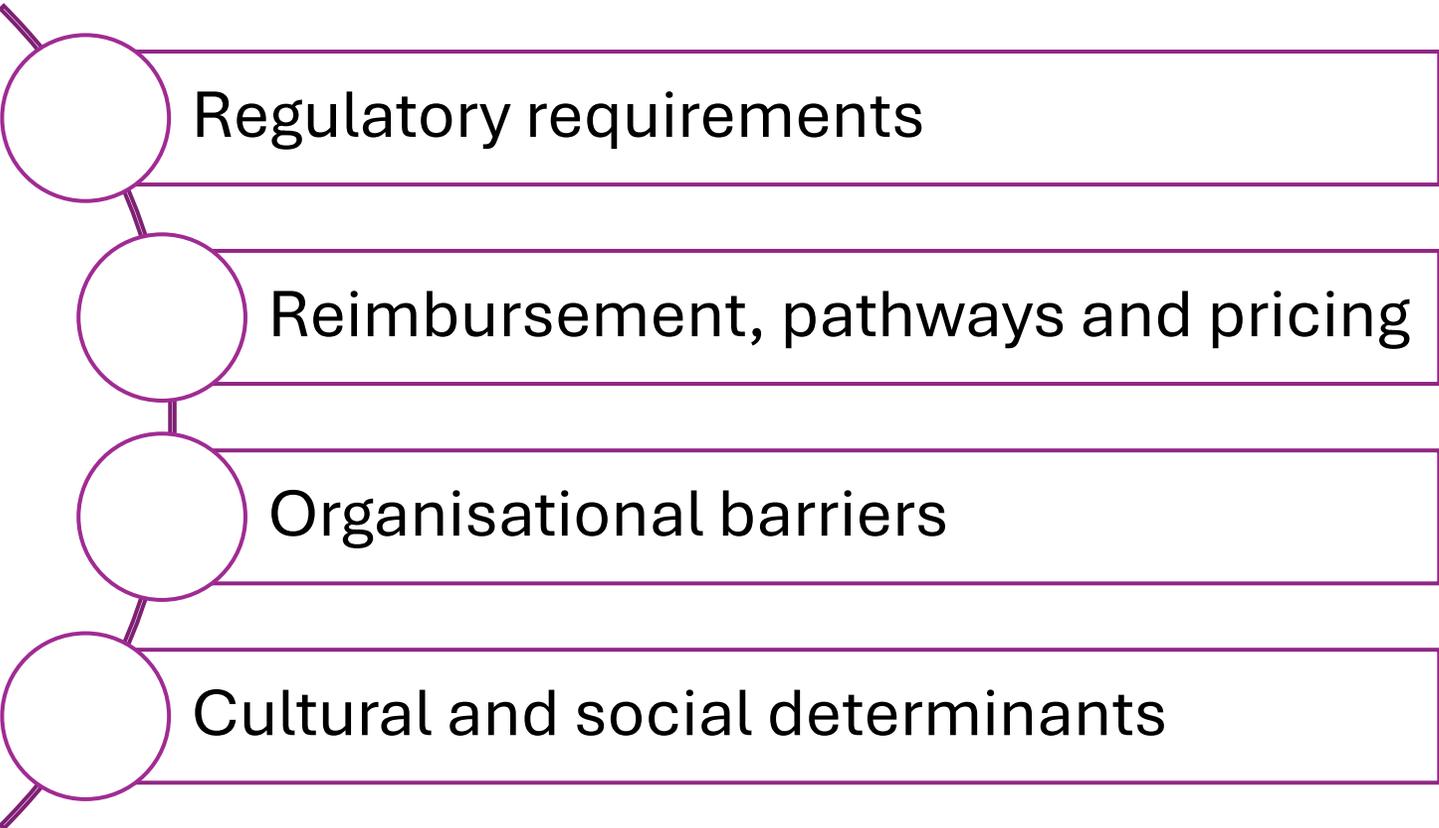

# Context II: Regulation

-  Medical Devices Regulation
-  General Product Safety Regulation
-  Artificial Intelligence Act
-  GDPR, Eu Health Data Space

# Context IV: Barriers to adoption

The potential of DHTs  
can only be realised  
when they are  
*integrated*  
into clinical practice

Regulatory requirements

Reimbursement, pathways and pricing

Organisational barriers

Cultural and social determinants

# Aim: A model for digital health uptake

 The aim was to explore a possible model of care in which **DHTs** and **DTx** *complement and support* education, prevention, and care of the **Italian NHS**.

# Methodology: Insider Action Research (AR)

**Practitioner-scholar:** research within own organisational context

## Context

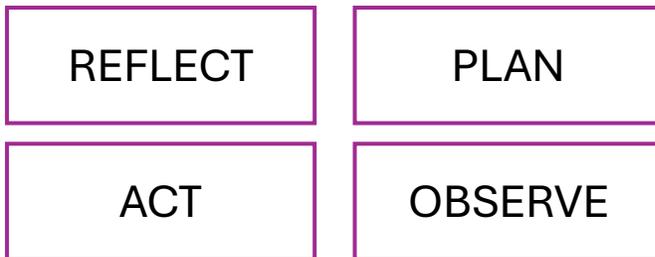

## Quality of relationships

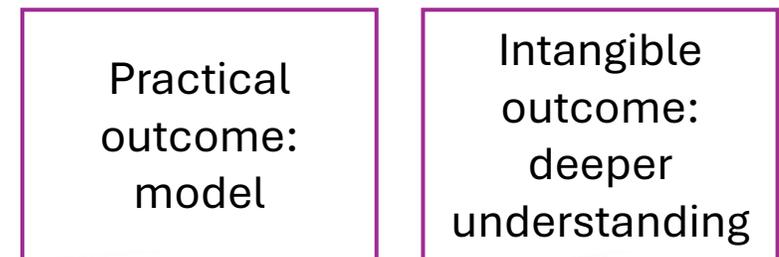

Ongoing

## Quality of the AR process

## Outcomes

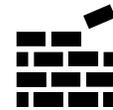

# Results I

FBK framework to guide the integration of DHTs and DTx in the Italian NHS, tailored to the specific context of Trentino healthcare system.

4 attributes:

HEALTHCARE  
PROFESSIONALS

INTEGRATION INTO  
CARE AS USUAL

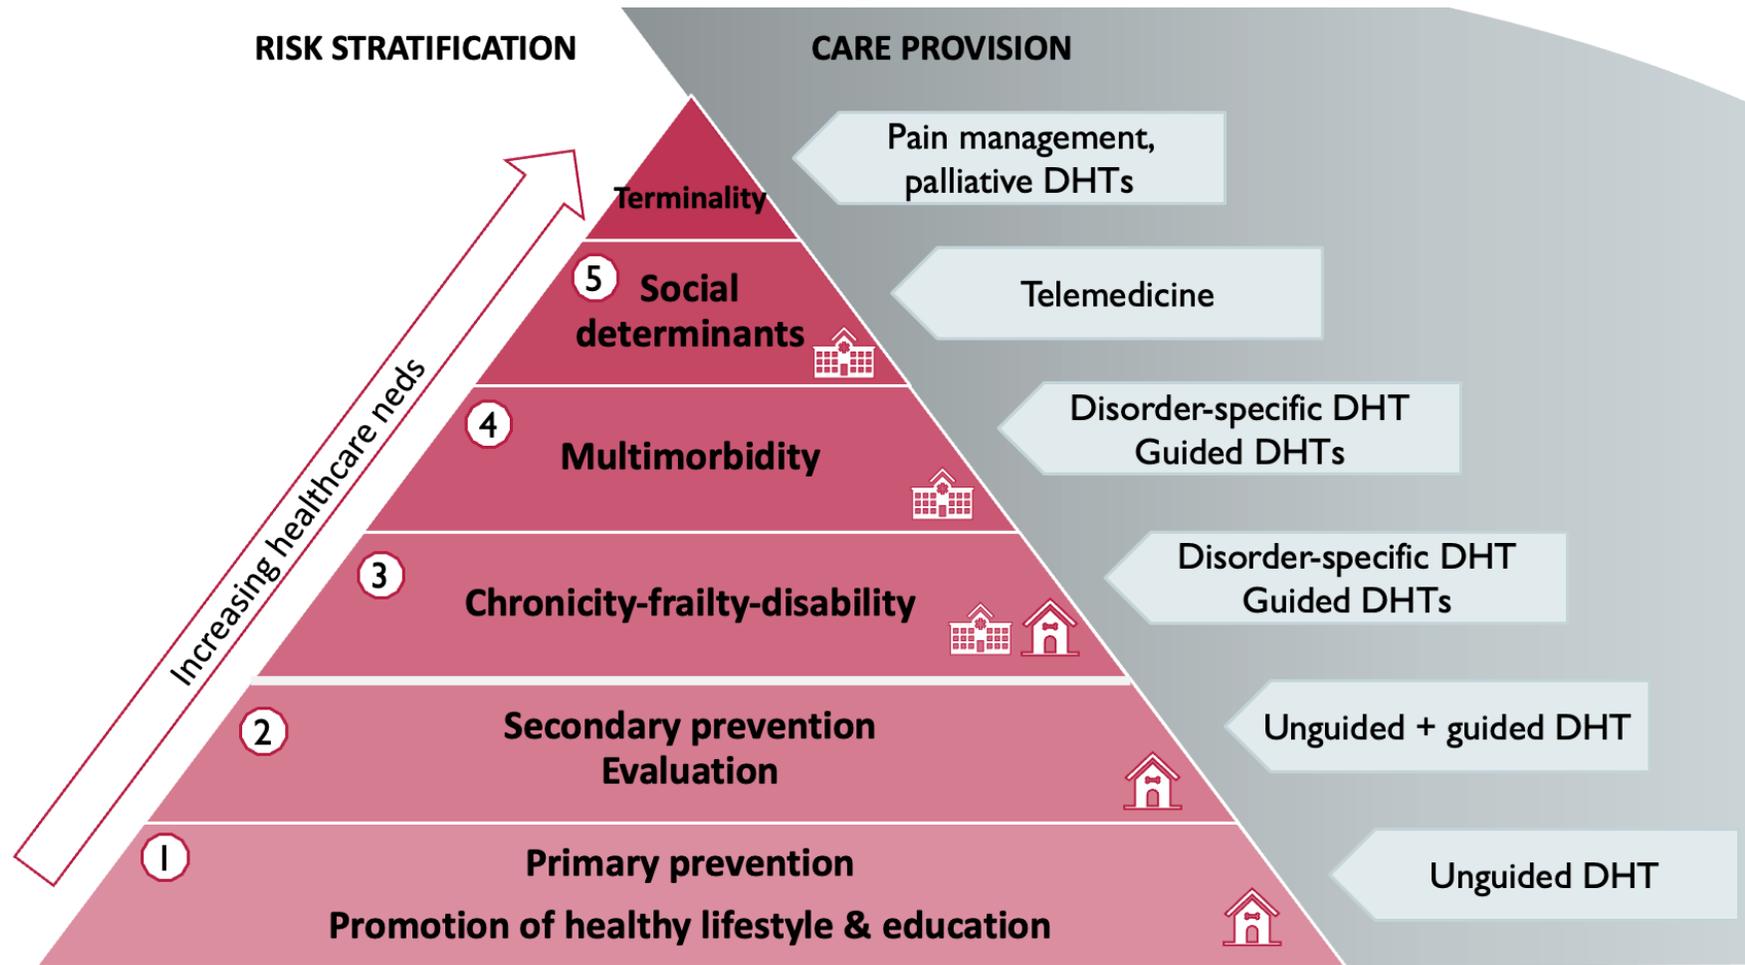

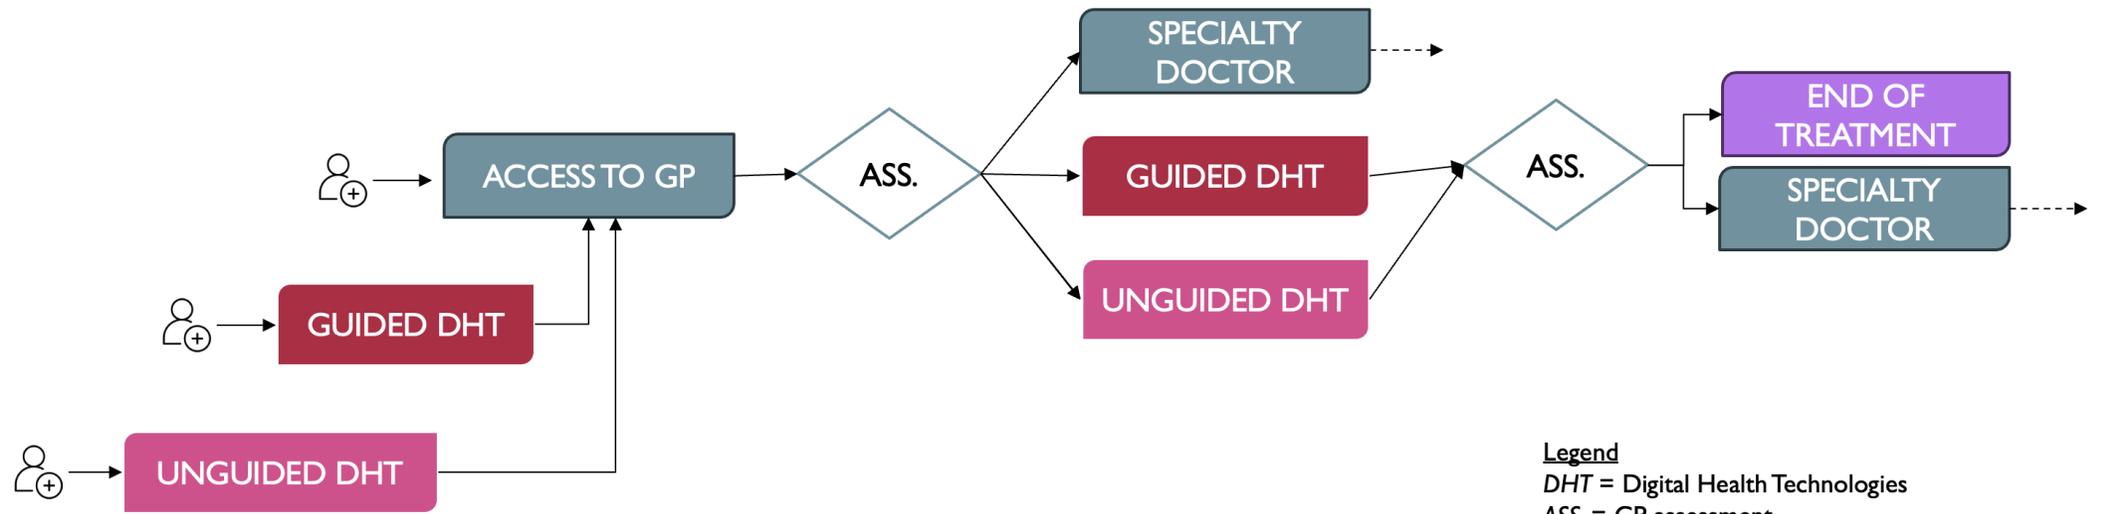

PATIENT RISK  
STRATIFICATION

GOVERNANCE

# Results II

**Legend**  
 DHT = Digital Health Technologies  
 ASS. = GP assessment  
 TERP = mental health rehabilitation technician  
 C. Nurse = Community Nurse

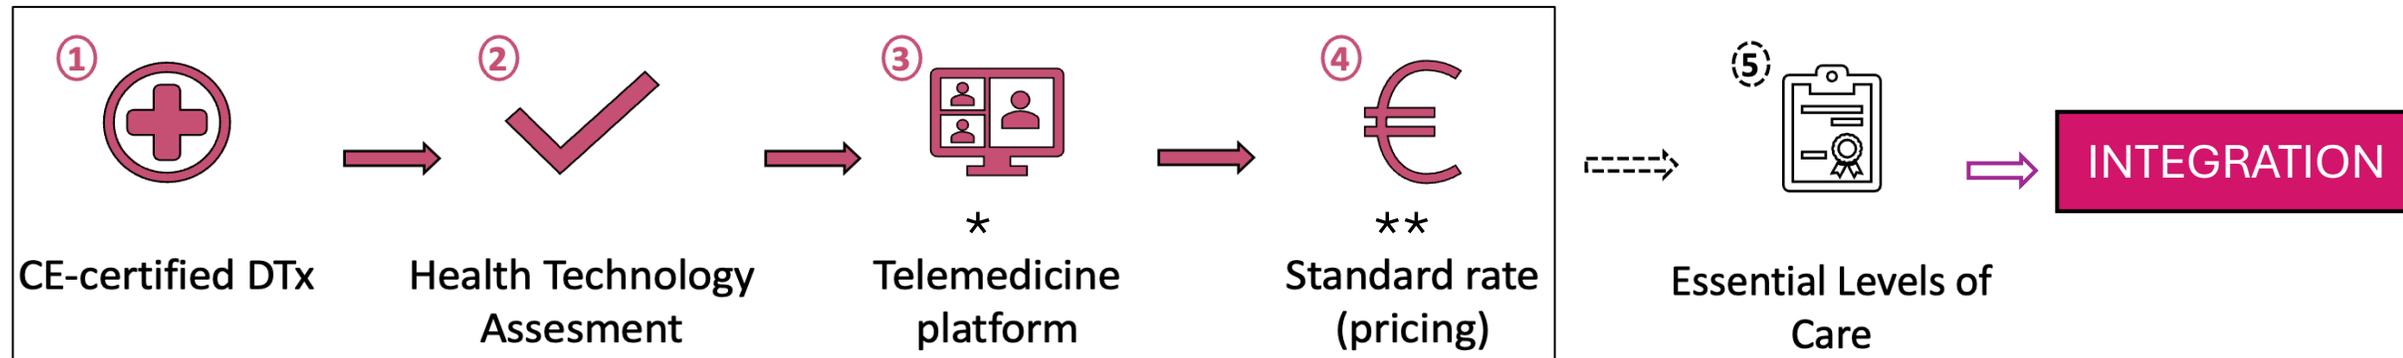

<b>GP</b>		X		X
<b>Assistant</b>	X		X	
<b>Comm. Nurse</b>	X		X	
<b>Specialist physician</b>			X	X
<b>TREC</b>	X	X	X	

Source: Author own elaboration

# Results IV

## Key milestones for DHT integration in care pathways

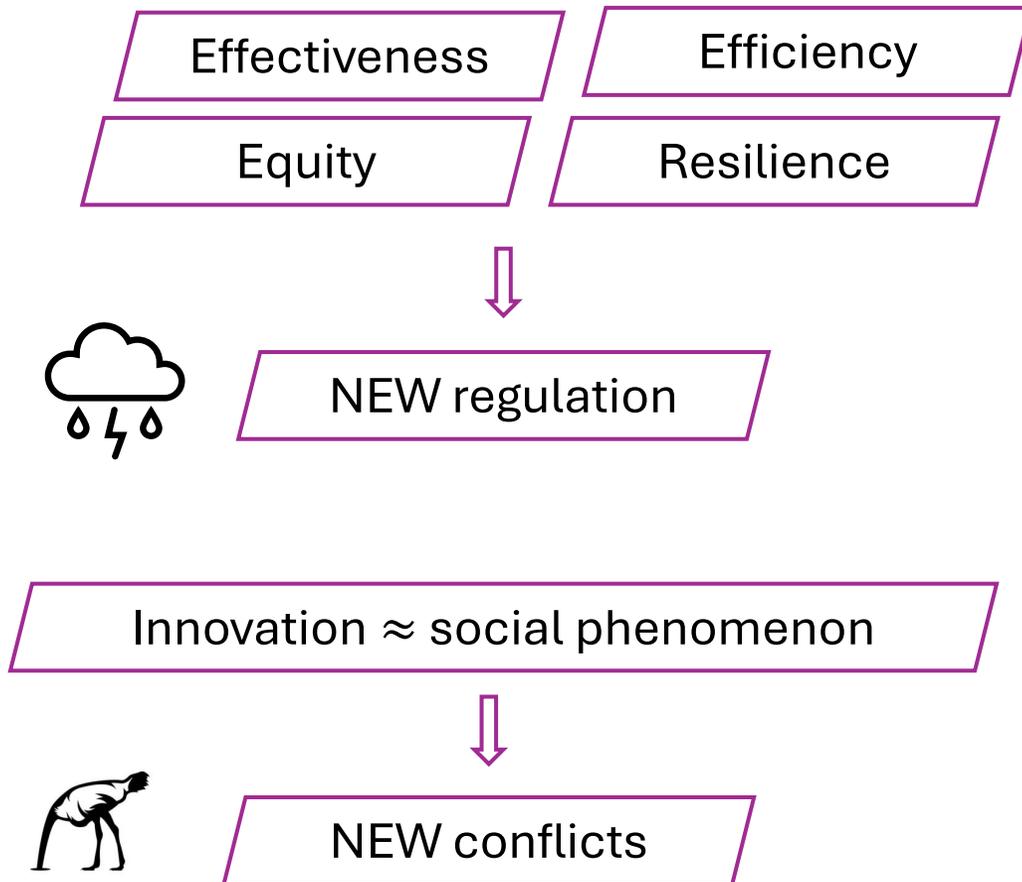

### RESEARCH & DEVELOPMENT

\* NRRP objective - in development

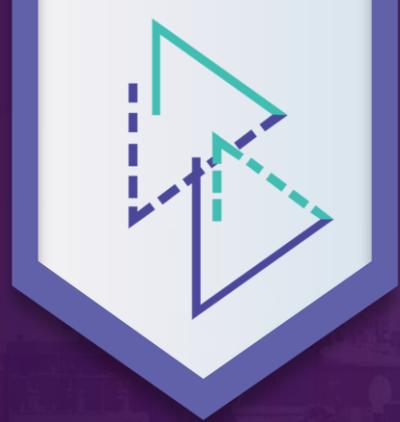

\*\* criteria to be defined

# Discussion & conclusion

## FUTURE RESEARCH

- How to prepare **clinicians**?
- Do we need **new** healthcare **professionals**?
- How to ensure **patient engagement** & adherence?
- Who & how will **assess** DTx in Italy?
- What criteria to establish the **pricing** of DTx?
- What **alternatives** to the centralised DiGA model?
